Get to Know a numpy Array

You will use the dataframe df for the following:

```
[1]: import pandas as pd

df=pd.DataFrame({'a': [11,21,31], 'b': [21,22,23]})
```

1) plot the first three rows:

```
[2]: df.head(3)
```

```
[2]:
```

	a	b
0	11	21
1	21	22
2	31	23

2) obtain column 'a'

```
[3]: df['a']
```

```
[3]:
```

0	11
1	21
2	31

Name: a, dtype: int64
